

**Janice Vera Neilson**  
**1944 –**

Jan is a very vital person, charged with an infectious drive that was almost checked in March 2001 with her diagnosis of breast cancer. She has run that gambit and survived by the grace of God and the most marvellous care and support of many many professional doctors, nurses, carers and support staff and organisations who swung into action like a well oiled machine.

They have our undying thanks and support for Jan's life returned to us.

From her family – Greg, Jae and Skye Neilson
